Reason for Allowance

The following is an examiner's statement of reason for allowance:

Claim 1 is allowable because there is no teaching or suggestion in the prior art of a device for applying a liquid dopant solution on the surface of a wafer comprising the combination of a dopant distribution device, a rotatable dopant-transfer roll horizontally translatable in a direction perpendicular to the axis of rotation of the dopant-transfer roll between a first roll position and a second roll position, and a work table for holding during normal operation the wafer to be provided with the dopant solution, wherein the dopant distribution device comprises a dopant-transfer block supported by a block holder and a fluid container having an open side enclosed by an edge, which open side is directed to the dopant-transfer block and which edge cooperates with at least one of the dopant-transfer block and the block holder to prevent leaking of dopant solution, wherein the block holder and the fluid container can be displaced relative to each other, wherein the block holder is horizontally translatable in a direction perpendicular to the axis of rotation of the dopant-transfer roll between a first block position in which the dopant-transfer block is under the open side of the fluid container and a second block position in which the dopant-transfer block has contacted the rotatable dopant-transfer roll in its first roll position, wherein during normal operation in the second roll position the rotatable dopant-transfer roll has contacted the wafer to provide dopant solution onto the surface of the wafer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
